FY 2027 Continuing Resolution (CR) Appropriations Issues

The below list assumes that section 101 - referring to the "authority and conditions" section - will include the following: divisions B through D of Public Law 119-37, divisions A through C of Public Law 119-74, divisions A through F of Public Law 119-75, and division A of Public Law 119-86.

Bill	Anomaly Name	Agency	Account	Anomaly Type	$ in Millions			Description
					2026 Enacted[1]	2027 Rate for Operations with Anomaly	Delta from 2026	
Multiple	Appropriated Entitlements and Other Mandatory Payments	Multiple	Multiple	Standard				Language is needed to ensure that funding for appropriated entitlements and other mandatory payments will continue at the rate to maintain program levels under current law and to ensure benefit payments are issued in a timely manner. Appropriated entitlements include, but are not limited to: Cost of War Toxic Exposure Fund; Grants to States for Medicaid; Payments to States for Child Support Enforcement and Family Support Programs; Social Services Block Grant; Payments for Foster Care, Prevention, and Permanency; Payments to Health Care Trust Funds; Supplemental Nutrition Assistance Program; Child Nutrition Programs; and the Supplemental Security Income Program.
Multiple	Continuing Rescissions of Discretionary Prior-Year Funds	Multiple	Multiple	Standard				Language is needed to allow continuing discretionary rescissions from prior-year funds in accounts with a rate for operations in the CR to be effectuated as a reduction in that rate for operations, rather than as a preclusion of carryover balances. Allowing agencies to reduce their rate for operations provides an affected account with the same annualized funding level as is otherwise provided by section 101. November 20, 2026 would be a reporting date on the comprehensive lists of rescissions that will allow final data to be reported.
Multiple	Intelligence Programs, State and International Assistance Waivers	Multiple	Multiple	Standard				Language is needed to authorize specific intelligence activities for the various Intelligence Program components before funds can be obligated or expended, as required by section 504 of the National Security Act of 1947. The Intelligence Program includes the Office of the Director of National Intelligence, the Central Intelligence Agency, and elements of the Departments of Defense, Energy, Homeland Security, Justice, State, and the Treasury. Intelligence activities will not continue in the absence of this authority. In addition, in the absence of an authorization bill, the Department of State, U.S. Agency for International Development, United States Agency for Global Media, and other agencies that operate under the authority of the State Department Basic Authorities Act and Foreign Relations Authorization Act also need waiver language that enables them to expend funds.
AG	Agricultural Credit Insurance Fund	USDA	Agricultural Credit Insurance Fund Program Account	Spend Faster Authority and Additional Authority				Language is needed to provide the U.S. Department of Agriculture with authority to obligate funding provided under the CR in the Farm Service Agency – Agricultural Credit Insurance Fund Program Account at a rate for operations necessary to support seasonal Direct Farm Ownership demand that aligns with the planting season. In addition, language is needed to remove the set-aside requirement for new and beginning farmers, which restricts funding available for other farmer demand. Without spend faster authority and the language fix, the account will rapidly exhaust funding for non-beginning farmers during the period of the CR.

Bill	Anomaly Name	Agency	Account	Anomaly Type	$ in Millions			Description
					2026 Enacted[1]	2027 Rate for Operations with Anomaly	Delta from 2026	
AG	Extension of Authorization for Livestock Mandatory Reporting	USDA	Agricultural Marketing Service	Authorizing Statute Expires				Language is needed to extend authorities for the Livestock Mandatory Reporting program, which expires on September 30, 2026. Without this anomaly, livestock market participants would no longer be required to report price and supply information, which facilitates market competition through open and transparent price discovery.
AG	Hemp Definition	USDA	Marketing Services	Additional Authority				Language is needed to update the statutory definition of final hemp-derived cannabinoid products to allow Americans to benefit from access to appropriate full-spectrum CBD products while preserving the Congress's intent to restrict the sale of products that pose serious health risks.
AG	Rural Development Spend Faster	USDA	Rural Development, Salaries and Expenses	Spend Faster Authority				Language is needed to provide the U.S. Department of Agriculture with authority to obligate funding provided under the CR in the Rural Development – Salaries and Expenses account at a rate for operations necessary to support its ongoing, enterprise-wide IT modernization effort. Without the anomaly, there would be cascading delays, cost increases, and prolonged reliance on legacy systems that are beyond their useful life.
AG	Rural Utilities Service Spend Faster	USDA	Rural Electrification and Telecommunications Loans Program Account	Spend Faster Authority				Language is needed to provide the U.S. Department of Agriculture with authority to obligate funding provided under the CR in the Rural Utilities Service – Rural Electrification and Telecommunications Loans Program account at a rate for operations necessary to meet borrower demand for guaranteed rural electric loans and direct loans. Without the anomaly, the Rural Utilities Service would face avoidable slowdowns that could increase project costs, delay service improvements, and hinder essential electric distribution, transmission, and generation investments.
CJS	Infrastructure Investment and Jobs Act and other transfers	DOC	NOAA, NTIA, EDA	Higher Rate for Operations	--	617	+617	Language is needed to provide Department of Commerce a rate for operations of $617 million for the following accounts: •$507 million in NOAA ORF •$44 million in NOAA PAC •$50 million in NTIA's S&E account •$16 million in EDA's EDAP account Without the anomaly, Commerce would be required to use IIJA carryover balances to provide all of NTIA's S&E funding and some of EDA's grants funding. In the absence of an anomaly, Commerce would also have to transfer IIJA balances for NOAA operations, and transfer funds from the Department's Nonrecurring Expenses Fund to provide some of NOAA's procurement funds. Most of this funding will not be available in 2027 because there are no longer IIJA balances available; the remainder would require transferring funds away from other existing programs.
CJS	Federal Bureau of Investigation, Salaries and Expenses	DOJ	Federal Bureau of Investigation, Salaries and Expenses	Spend Faster Authority				Language is needed to provide the Federal Bureau of Investigation with authority to obligate funding provided under the CR in the Salaries and Expenses account at a rate for operations necessary to support the 2028 Olympics in Los Angeles and the purchase and deployment of devices for National Security System (NSS)Cybersecurity during the period of the CR. Without this anomaly, critical, time sensitive procurements for the Olympics and NSS-related cybersecurity activities would have to be delayed during the period of the CR.

Bill	Anomaly Name	Agency	Account	Anomaly Type	$ in Millions			Description
					2026 Enacted[1]	2027 Rate for Operations with Anomaly	Delta from 2026	
CJS	General Legal Activities	DOJ	General Legal Activities	Higher Rate for Operations	900	930	+30	Language is needed to provide a rate for operations of $930 million for the Department of Justice, General Legal Activities account to support the newly established National Fraud Enforcement Division. Without the anomaly, insufficient funding would be available to support both the new division and current service requirements for the other components of the account during the period of the CR.
CJS	U.S. Marshals Service, Salaries and Expenses	DOJ	U.S. Marshals Service, Salaries and Expenses	Higher Rate for Operations	1,702	1,811	+109	Language is needed to provide the Department of Justice with a rate for operations of $1.8 billion for the U.S. Marshals Service (USMS), Salaries and Expenses account in order to sustain operations during the period of the CR. Without the anomaly, USMS would have insufficient funds to sustain operations and execute three realignments: the continued implementation of the transfer of INTERPOL Washington functions to USMS; incorporating funding from the dissolution of the Organized Crime Drug Enforcement Task Forces into USMS's base funding; and a technical realignment of functions from Federal Prisoner Detention.
DE	Battleship Advance Procurement Program	DOW	Shipbuilding and Conversion, Navy	Additional Authority				Language is needed to provide the Department of War new start authority for the Battleship Advance Procurement program using funding provided by the CR in the Shipbuilding and Conversion, Navy account, in an amount not to exceed $1 billion. Without the anomaly, the Department would be unable to begin advance procurement of the nuclear propulsion work necessary for ship construction.
DE	Critical Munitions	DOW	Procurement, Defense-Wide; Missile Procurement, Army; Weapons Procurement, Navy	Spend Faster Authority				Language is needed to authorize the Department of War (DOW) to obligate amounts provided under the CR formula in three accounts—Procurement, Defense-Wide (PDW), Missile Procurement, Army (MPA), and Weapons Procurement, Navy (WPN)—at a rate for operations necessary to support the following five critical munitions programs: 1) Standard Missile 3 – Block IIA (PDW); 2) Standard Missile 3 – Block IIB (PDW); 3) Phased Array Tracking to Intercept on Target Advanced Capability – 3 Missile Segment Enhancement (MPA); 4) Advanced Medium-Range Air-to-Air Missile (WPN); and 5) Tomahawk Land Attack Missile and Maritime Strike Tomahawk (WPN). Without the anomaly, the Government may incur cancellation liabilities on multi-year procurement contracts if it does not order the negotiated production quantities.
DE	CVN-82 (Advance Procurement)	DOW	Shipbuilding and Conversion, Navy	Spend Faster Authority				Language is needed to authorize the Department of War (DOW) to obligate the amount provided under the CR formula in the Shipbuilding and Conversion, Navy, account at a rate for operations necessary to support CVN 82, the projected fifth nuclear-powered aircraft carrier of the *Gerald R. Ford* class. Without the anomaly, DOW would not be able to award a contract for long lead time materials, leading to delays in the construction timeline of the CVN 82 and could increase costs.

Bill	Anomaly Name	Agency	Account	Anomaly Type	$ in Millions			Description
					2026 Enacted[1]	2027 Rate for Operations with Anomaly	Delta from 2026	
DE	Military Health	DOW	Defense Health Program (2026 account), Combat and Operational Medicine Program and Private Sector Care (2027 accounts)	Additional Authority and Higher Rate for Operations	41,775	45,017	+3,242	Language is needed to authorize the Department of War to obligate funds provided by the CR for the Defense Health Program account to instead provide funding in the Combat and Operational Medicine Program (COMP) and the Private Sector Care Program (PSCP) accounts, as adopted in H.R. 9495. In addition, language is needed to provide a rate for operations of $22.3 billion for the COMP account and a rate for operations of $22.7 billion for the PSCP account. Without the anomaly, manual adjustments of the obligations and disbursements would be required, resulting in an administrative burden adversely impacting DOW's mission execution, as staff would devote more time to duplicative administrative work. In addition, DOW would likely have to divert care from the direct care system to a higher cost private sector care option, and would likely see delayed or cancelled healthcare delivery in the private sector.
DE	National Security Systems	DOW	Procurement, Defense-Wide	Higher Rate for Operations and Spend Faster Authority	7,131	10,355	+3,224	Language is needed to provide the Department of War (DOW) a rate for operations of $10.3 billion for the Procurement, Defense-Wide account and authority to obligate this funding at a rate for operations necessary to support National Security Systems. Without the anomaly, DOW would not be able to acquire equipment in support of an Administration priority that is critical to national security. Additional information is available at a higher classification.
DE	Navy Shipbuilding, Cost-to-Complete	DOW	Shipbuilding and Conversion, Navy	Spend Faster Authority				Language is needed to authorize the Department of War (DOW) to obligate the amount provided under the CR formula in the Shipbuilding and Conversion, Navy, account at a rate for operations necessary to support the Cost-to-Complete program. Without the anomaly, DOW would need to issue stop work orders on the *Columbia* - and *Virginia* -class submarines, DDG-51, and Carrier Replacement Program and would be unable to pay for planned Economic Price Adjustments.
DE	Production Rate Increases	DOW	Multiple	Additional Authority				Language is needed to exempt Department of War programs funded in the Working Families Tax Cut Act (Public Law 119-21) from the section 102 restrictions on production rate increases. Without an anomaly and under standard CR language these programs would not receive funding in FY 2027 nor would they be allowed to increase production rates, forcing immediate work stoppages and contract terminations.
DE	Unmanned and Autonomous Systems	DOW	Multiple	Additional Authority				Language is needed to exempt Department of War's Unmanned (UxS) and Autonomous Systems programs, which were funded in the Working Families Tax Cut Act (Public Law 119-21), from the section 102 restrictions on production rate increases. Without an anomaly and under standard CR language these programs would not receive funding in FY 2027 nor would they be allowed to increase production rates, forcing immediate work stoppages and contract terminations.

Bill	Anomaly Name	Agency	Account	Anomaly Type	$ in Millions			Description
					2026 Enacted[1]	2027 Rate for Operations with Anomaly	Delta from 2026	
EW	National Nuclear Security Administration 301(d) Relief	DOE - NNSA	Weapons Activities	Other Funding Issue				Language is needed to waive the restrictions included in division B, section 301(d) of Public Law 119-74, so that the Department of Energy, National Nuclear Security Administration (NNSA) may reallocate funding needed during the period of the CR for Weapons Activities. Attaining relief from section 301(d) would provide NNSA with the flexibility necessary to effectively execute the nuclear modernization program of record during the CR period. Without this anomaly, critical national security programs including, but not limited to, the U1a Complex Enhancements project, the Electrical Power Capacity Upgrade project, the ZEUS Test Bed Facilities Improvements project, and Studies and Assessments would risk significant delays.
EW	CALFED Bay-Delta Program Act Ceiling Increase	DOI	California Bay-Delta Restoration (CALFED)	Additional Authority				Language is needed to authorize an increase of $7.4 million to the statutory funding ceiling on program management of the Calfed Bay-Delta program at the Department of the Interior's Bureau of Reclamation during the period of the CR. The Calfed Bay-Delta program focuses on ecosystem restoration, water supply reliability, and levee system integrity in California's Bay Delta region. Without the anomaly, the Bureau of Reclamation would likely reach the current statutory ceiling, limiting its ability to carry out program management, oversight, and planning activities for the program.
FSGG	Internal Revenue Service - Technology and Operations Support	Treasury	Operations Support	Other Funding Issue				Language is needed to prevent the FY 2026 enacted Internal Revenue Service (IRS) $11,661 million rescission of unobligated balances from recurring during the period of the CR. Without the anomaly, these balances would continue to be precluded from obligation during the period of the CR, hindering the implementation of the IRS IT Modernization plan.
FSGG	Treasury Departmental Offices G7	Treasury	Departmental Offices—Salaries and Expenses	Additional Authority				Language is needed to authorize the Department of the Treasury to obligate funding in the Departmental Offices Salaries and Expenses account at a rate for operations necessary to host the G7 Financial Summit. Without the anomaly, Treasury would have a problem fulfilling the Administration's host nation responsibilities.
FSGG	Technology Modernization Fund	GSA	Technology Modernization Fund	Other Funding Issue				Consistent with the Administration's proposal to extend the authorization for the General Services Administration, Technology Modernization Fund (TMF), language is needed to rescind and reappropriate balances available in the TMF account. The extension would allow the TMF Board to issue agencies awards for new IT modernization projects in FY 2027, and this anomaly would allow them to use currently available balances, in addition to other amounts made available. Without an extension, the TMF Board would halt its review and issuance of awards for Government-wide projects, delaying critical cybersecurity and modernization efforts and reducing projected cost savings.

Bill	Anomaly Name	Agency	Account	Anomaly Type	$ in Millions			Description
					2026 Enacted[1]	2027 Rate for Operations with Anomaly	Delta from 2026	
FSGG	Business Loan Programs	SBA	Business Guaranteed Loan Financing	Spend Faster Authority				Language is needed to provide the Small Business Administration (SBA) with authority to obligate funding provided under the CR at a rate for operations necessary to accommodate potential demand increases during the period of the CR for business loan commitments, commitments to guarantee trust certificates, and commitments to guarantee loans for debentures in SBA's 7(a), Small Business Investment Company, Secondary Market Guarantee, and 504 programs. Without the anomaly, these lending programs may not have sufficient funds to meet demands in FY 2027, potentially forcing these programs to shut down or delay financing to thousands of small businesses during the CR period.
HS	Disaster Relief Fund Spend Faster	DHS	Disaster Relief Fund	Spend Faster Authority				Language is needed to provide the Department of Homeland Security with authority to obligate funding provided under the CR in the Disaster Relief Fund at a rate for operations necessary to support operations for response and recovery activities under the Robert T. Stafford Disaster Relief and Emergency Assistance Act. Without the anomaly, comprehensive disaster response and recovery could be impeded should a catastrophic event be declared during the period of the CR.
HS	United States Secret Service Spend Faster	DHS	United States Secret Service, Operations and Support	Spend Faster Authority				Language is needed to provide the Department of Homeland Security with authority to obligate funding provided under the CR in the United States Secret Service, Operations and Support account at a rate for operations necessary to pay onboard personnel and begin preparations for the 2028 Presidential campaign and 2028 Olympics in Los Angeles during the period of the CR. Without this anomaly, long-lead procurements for the Olympics would have to be deferred and resources may be insufficient to sustain protective operations during the period of the CR.
IN	Indian Health Facility New Facility Staffing	HHS	Indian Health Services and Indian Health Facilities	Higher Rate for Operations and Spend Faster Authority	5,863	5,947	+84	Language is needed to provide the Indian Health Service (IHS), Indian Health Services account an additional rate for operations of $76 million and the Indian Health Facilities account an additional rate for operations of $8 million, and authority to obligate both accounts at a rate for operations necessary to support staffing and operating costs at five newly opened or opening Tribal Health Facilities. Without the anomaly, IHS would have to reduce funding for other direct patient care services to pay for these additional operating and staffing costs.
IN	Address Case Backlogs Pending Before the Interior Board of Land Appeals and Interior Board of Indian Appeals	DOI	Office of the Secretary, Office of Hearings and Appeals	Additional Authority				Language is needed to authorize the Department of the Interior to expedite issuance of an appeal decision in cases pending more than 18 months before the Interior Board of Land Appeals, the Interior Board of Indian Appeals, or the Departmental Cases Hearings Division in order to address the current backlog of pending cases. Without the anomaly, the Department of the Interior would be limited in addressing the current backlog through a rulemaking, delaying action for appellants in these cases.

Bill	Anomaly Name	Agency	Account	Anomaly Type	$ in Millions			Description
					2026 Enacted[1]	2027 Rate for Operations with Anomaly	Delta from 2026	
IN	Annual Pay Cap Waiver	DOI	Multiple	Additional Authority				Language is needed to waive the annual premium pay cap so that DOI employees can receive premium pay, as appropriate, for overtime and relocations during remainder of the calendar year in support of Administration priorities, such as events celebrating America's Semiquincentennial. These employees, including law enforcement, often worked more than eight hours daily and 40 hours a week in support of these events. Without the anomaly, these employees will reach the statutory maximum and will not receive overtime or other types of premium pay beginning in the first quarter of FY 2027.
IN	Expansion of Hazardous Fuels Mitigation Authorities	DOI	US Wildland Fire Service	Additional Authority				Language is needed to expand the authorities available to the Department of the Interior (DOI) for hazardous fuels mitigation on high-hazard lands, highly-valued ecosystems, and areas around critical infrastructure in order to help mitigate the risk of wildfire. In addition, language is needed to increase the number of acres of federally-administered lands that are excluded from the requirements of the National Environmental Policy Act of 1969. Without the anomaly, DOI would be unable to aggressively undertake hazardous fuels mitigation activities, which is key to reducing fire risk and intensity.
IN	Office of Inspector General - Infrastructure Act Transfers	DOI	Office of Inspector General	Higher Rate for Operations	12	65	+53	Language is needed to provide the Office of Inspector General with a rate for operations under the CR derived from the General Fund of the Treasury. In 2026, this account's appropriation was derived from unobligated balances that were originally appropriated by the Infrastructure Investment and Jobs Act (Public Law 117-58). Without this anomaly the account would lack the resources to continue operations, as there are insufficient IIJA balances to provide this appropriation in FY 2027.
IN	Office of Navajo and Hopi Indian Relocation Authorities	DOI	Bureau of Indian Affairs	Additional Authority				Language is required to provide additional authority for the Department of the Interior (DOI) to carry out the authorized functions of the Office of Navajo and Hopi Indian Relocation (ONHIR), a small independent agency that has ceased operations. Under current authority, DOI is not authorized to undertake the authorized activities of the ONHIR program activity in FY 2027. Without the anomaly, the Department would be unable to carry out ONHIR's remaining responsibilities relating to pending certified relocation applications and appeals.
IN	Operation of the National Park System	DOI	National Park Service	Higher Rate for Operations	2,901	3,014	+113	Language is needed to provide the National Park Service with an additional rate for operations $3,014 million, an increase of $113 million, for the Operation of the National Park System. Without this anomaly, there would be insufficient funding to cover the costs of park police salaries and expenses related to the hiring surge and to recoup costs associated with support of events celebrating America's Semiquincentennial.
IN	Wildland Fire Management - Infrastructure Act Transfers	DOI	Multiple	Higher Rate for Operations	384	1,147	+763	Language is needed to provide the Wildland Fire Management account with a rate for operations under the CR derived from the General Fund of the Treasury. In 2026, a large portion of this account's appropriation was derived from unobligated balances that were originally appropriated by the Infrastructure Investment and Jobs Act (Public Law 117-58). Without this anomaly the account may lack the resources to continue operations if there are insufficient balances to provide this appropriation in FY 2027.

Bill	Anomaly Name	Agency	Account	Anomaly Type	$ in Millions			Description
					2026 Enacted[1]	2027 Rate for Operations with Anomaly	Delta from 2026	
IN	Wildland Fire Management - Fire Reserve	DOI & USDA	Wildfire Suppression Reserve	Spend Faster Authority				Language is needed to authorize the Forest Service within the Department of Agriculture and the US Wildland Fire Service within the Department of the Interior (DOI) to obligate funding under the CR formula in the DOI Wildland Fire Suppression Operations Reserve Fund at a rate for operations necessary for wildfire suppression operations. Without the anomaly, the Forest Service and US Wildland Fire Service fire suppression activities may be hampered due to the unpredictability of fire suppression expenses.
IN	Wildland Fire Management - Suppression Operations	DOI & USDA	US Wildland Fire Service & Forest Service	Spend Faster Authority				Language is needed to authorize the Forest Service within the Department of Agriculture and the US Wildland Fire Service within the Department of the Interior (DOI) to obligate funding under the CR formula in the DOI Wildland Fire Management at a rate for operations necessary for wildfire suppression operations. Without the anomaly, the Forest Service and US Wildland Fire Service are unlikely to have sufficient resources to effectively manage wildland fires to prevent loss of life and property at the end of calendar year 2026, during the first quarter of FY 2027.
IN	Water Infrastructure in North Carolina	EPA		Appropriation (Standalone)	--	1,100	+1,100	Language is needed to appropriate $1.1 billion to the Environmental Protection Agency (EPA) Clean Water State Revolving Fund for the restoration and repair of wastewater and stormwater systems and drinking water infrastructure across Hurricane Helene-impacted areas of North Carolina. Without the anomaly, EPA would not have sufficient resources to assist these areas in restoring critical water infrastructure.
MilCon/VA	Medical Education and Training Complex Unaccompanied Housing Military Construction Authorization	DOW	Multiple	New Start Authority				Language is needed to authorize the Department of War (DOW) to construct new Navy and Army unaccompanied housing at the Medical Education and Training Complex at Joint Base San Antonio during the period of the CR. DOW is in the process of vacating 5,400 mostly military medical personnel from the existing housing facilities on base, which were constructed in the early 2000s and which the Department has determined to be inhabitable due to severe mold. Without the anomaly, DOW would be unable to begin construction of priority unaccompanied housing facilities.
NSRP	Domestic Counter Unmanned Aircraft Systems Authority	State		Additional Authority				Language is needed to authorize the Department of State to conduct domestic Unmanned Aircraft Systems (UAS) detection and Counter-Unmanned Aircraft Systems (C-UAS) missions, as well as domestic research, development, testing, and evaluation of UAS detection and C-UAS equipment. Without the anomaly, the Department of State would need to first coordinate with the Federal Aviation Administration before conducting domestic UAS activities, which could present challenges in a threat scenario. The Departments of Justice, Homeland Security, War, and Energy already possess similar authorities.
NSRP	Enterprise Fund	State	National Security Investment Programs, Economic Support Fund	Additional Authority				Language is needed to authorize the Department of State to operate enterprise funds globally in the National Security Investment Programs and Economic Support Fund accounts. Current authority geographically restricts the operation of enterprise funds to Eastern Europe and Eurasia. Without the anomaly, the Department of State would be limited to using traditional assistance mechanisms, which may be less effective when responding to rapidly emerging opportunities or crises, particularly in the Western Hemisphere.

Bill	Anomaly Name	Agency	Account	Anomaly Type	$ in Millions			Description
					2026 Enacted[1]	2027 Rate for Operations with Anomaly	Delta from 2026	
NSRP	U.S. Agency for International Development Consolidation	State	Multiple	Additional Authority				Language is needed to provide the Department of State with additional authorities to complete U.S. Agency for International Development (USAID) closeout activities and transfer former USAID foreign assistance functions to the Department of State.
NSRP	U.S. International Development Finance Corporation Countries of Concern	DFC	DFC Program Account	Additional Authority				Language is needed to authorize a waiver process that would allow the Development Finance Corporation (DFC) to support projects in Venezuela. Venezuela is currently on the list of foreign countries that DFC is prohibited from working in, and this anomaly would provide a certification process for the Secretary of State to confirm that projects align with foreign policy or national security priorities. Without the anomaly, DFC would be unable to provide key financing to restore Venezuelan infrastructure, thereby limiting the United States' ability to further its economic and foreign policy goals.
NSRP	U.S. International Development Finance Corporation Loan Limit Increase	DFC	DFC Program Account	Additional Authority				Language is needed to authorize the Development Finance Corporation (DFC) Program account to carry out an additional $15 billion in new direct or guaranteed loans, for a total loan principal or guaranteed principal limit of $30 billion. Without the anomaly, DFC would be unable to execute on the current pipeline of projects and anticipated growth in investment activity, and would lack the flexibility to address emerging needs.
THUD	FY 2027 Housing Choice Vouchers - Repurposing Set-Aside Funding	HUD	Tenant-Based Rental Assistance (TBRA)	Additional Authority				Language is needed to provide the Department of Housing and Urban Development's Tenant-Based Rental Assistance account with authority to use unobligated carryover funding for the purpose of addressing funding shortfalls and maintaining current services for Public Housing Agencies (PHAs). Language is also needed to authorize the use of these funds during calendar year 2026, removing a current restriction which limits the availability of the funding to the beginning of calendar year 2027. Without the anomaly, PHAs would have insufficient funds to maintain assistance for tens of thousands of households.
THUD	Federal Aviation Administration Spend Faster	DOT	Federal Aviation Administration, Facilities and Equipment	Spend Faster and Additional Authority				Language is needed to provide the Federal Aviation Administration (FAA) with additional authority and the ability to obligate funding provided under the CR in the Facilities and Equipment account at a rate for operations and for certain activities necessary to support the Brand New Air Traffic Control System (BNATCS) initiative. Without this anomaly, FAA would not have adequate funding for critical BNATCS Business Line Items which would increase costs and delay completion dates for the initiative.
THUD	Federal Transit Administration Extended Disbursement Authority	DOT	Federal Transit Administration, Capital Investment Grant Account	Other Funding Issue				Language is needed for the Federal Transit Administration to extend disbursement authority through FY 2031 for Capital Investment Grant account obligations that were incurred using FY 2018 through FY 2021 appropriations. Without the anomaly, disbursements for up to fourteen projects with active construction grant agreements will cease after September 30, 2026.

Bill	Anomaly Name	Agency	Account	Anomaly Type	$ in Millions			Description
					2026 Enacted[1]	2027 Rate for Operations with Anomaly	Delta from 2026	
THUD	National Highway Traffic Safety Administration Operations and Research	DOT	National Highway Traffic Safety Administration, Operations and Research	Higher Rate for Operations	--	79	+79	Language is needed to provide the National Highway Traffic Safety Administration (NHTSA) Operations and Research account with an additional rate for operations of $79 million to support current program requirements and staffing during the period of the CR. Of the $200 million appropriated to the account in FY 2026, $129 million was required to be derived from unobligated balances previously appropriated in the Infrastructure Investment and Jobs Act (IIJA). Insufficient IIJA balances remain in FY 2027 to maintain a rate for operations consistent with the total appropriated to the account in FY 2026. Without the anomaly, NHTSA would likely have to furlough staff, insufficient funding would be available to carry out critical Vehicle Safety programs, and research efforts would be significantly delayed during the period of the CR.
THUD	Repurposed Infrastructure Investment and Jobs Act (IIJA) Balances - Federal Aviation Administration	DOT	Federal Aviation Administration, Multiple Accounts	Other Funding Issue				Language is needed to remove the requirement to derive funds appropriated to the Grants-in-Aid for Airports account from the unobligated Infrastructure Investment and Jobs Act (IIJA) balances previously appropriated to the Airport Infrastructure Grants and Airport Terminal Program accounts. Without the anomaly, the remaining balances in the transferring accounts would be precluded from obligation during the period of the CR, and insufficient funding would exist for payroll and other administrative activities to continue for ongoing grants oversight and obligations on grants already publicly awarded would be paused.
THUD	Repurposed Infrastructure Investment and Jobs Act (IIJA) Balances - National Electric Vehicle Infrastructure Program	DOT	Highway Infrastructure Program	Other Funding Issue				Language is needed to change the fiscal year from fiscal year 2022 to fiscal years 2022 through 2026, and the "as of" date from January 31, 2026 to September 30, 2026 for the unobligated Infrastructure Investment and Jobs Act (IIJA) balances previously appropriated for the National Electric Vehicle Infrastructure (NEVI) Program and required to be the source of funds derived for the Highway Infrastructure Programs (HIP) appropriation in FY 2026. Without the anomaly, the Department of Transportation would be unable to immediately execute the language if continued as a term and condition of the CR.

[1]The table includes 2026 Enacted and 2027 Anomaly levels where items are asking for a rate for operations that will score as a cost. However, for those items where the anomaly is needed to derive funding from the general fund instead of IIJA carryover balances, the 2026 enacted column reflects the current estimated rate for operations that the account would have under the CR absent an anomaly.

Bill	Anomaly Name	Agency	Account	Anomaly Type	$ in Millions			Description
					2026 Enacted[1]	2027 Rate for Operations with Anomaly	Delta from 2026	
Authorizing Proposal, Not for Inclusion in the CR Division								
Authorizing Division	Relief from Mandatory Defense Sequestration	DOW	N/A	N/A				Language should be included in an authorizing division to exempt mandatory balances provided through Public Law 119-21 from sequestration. Without the anomaly, approximately eight percent of unobligated multiyear balances provided by Public Law 119-21, which are essential for defense modernization, procurement, and readiness, would be unavailable for its originally appropriated intent and duration.
Authorizing Division	Western Hemisphere Travel Initiative (WHTI)	State	N/A	N/A				Language should be included in an authorizing division to provide the Department of State with an extension of authorization to collect Western Hemisphere Travel Initiative (WHTI) surcharges for deposit in the Consular and Border Security Programs account. The current authority to collect these surcharges expires on September 30, 2026. Without the anomaly, the Department will lose the ability to collect WHTI revenues, and the Department's passport operations would be significantly impacted.
